## ***Australian Owned & Tested***

When three automotive pioneers came together over 80 years ago, little did they know they were on the verge of establishing one of the biggest and most trusted Australian-owned automotive brands – Ryco Filters.

Across eight decades, with a commitment to continually innovate, to the implementation of new technologies and cutting-edge manufacturing techniques, and with quality as the centrepiece of its focus, Ryco has become one of the most important brands in the automotive business. One that has been embraced by customers, suppliers and original equipment manufacturers.

This doesn't just happen, trust in your product has to be achieved. To ensure

we stand out from the crowd, and to prove our product is a market leader, Ryco established Australasia's only dedicated filtration laboratory.

Here, Ryco engineers carefully test all filters under Australian conditions to ensure they meet or exceed original equipment specifications. Tested according to SAE and ISO industry standards, our filters offer peace of mind for optimum engine protection, guaranteed.

## ***Genuine Performance***

Ryco's design philosophy is to give you quality filters that meet or exceed original equipment manufacturer specifications. To reach this level of genuine performance we believe a filter must achieve in three critical areas - Efficiency, Life and Flow.

A good performing filter must excel in all three critical areas to be deemed fit to do the job, every time. Efficiency focuses on the percentage of dirt that a filter removes. Life considers how long a filter lasts before clogging up. And flow determines how easily air, oil or fuel flows through the filter.

The Ryco engineering team conducts regular product testing right here in Australia to ensure you are getting the optimum filter, so that the Ryco name continues to provide you with genuine high quality performance filters, that you can trust.

It's what we call 'The Ryco Difference', and it's what sets us apart from all of our competition, and why Ryco is Australia's favourite filter brand, guaranteed.

## NORTH AMERICAN

North American manufacturers of heavy vehicle are a leading choice for freight and long-haul logistic providers. When it comes to filtration, there is a trusted, proven and tested range from Ryco that support the North American fleet.

Whether driven by CAT, Detroit or Cummins, these prime movers need to be powerful, reliable and fuel-efficient. Keeping to those specifications requires regular service work and quality filtration products.

Ryco's comprehensive coverage expands over key manufacturers including Kenworth, Western Star, Mack and Freightliner with a full family of filtration products.

The Ryco team work closely with our customers in fleet service operations and understand the challenges of inventory filtration products. To help drive efficiency in these service operations Ryco offers a range of service kits that are clearly labelled with interchange

part numbers for ease of reference by technicians.

The service kits are specific to the engine manufacturers, Cummins, Detroit, CAT and MACK and provide common oil and fuel filter needs.

As a company driven by innovation and the goal to provide the best filter possible, the testing facilities and procedures of Ryco not only meet global ISO standards, but the Ryco lab equipment can test beyond standard ISO requirements.

When testing filters, especially those suited to large capacity engines, Ryco selects a fine particle or dust to test with, ensuring a Ryco filter is designed to operate and combat the local geography and the fine silicate particles that an engine can ingest from our environment.

Ryco is leading the industry when it comes to cabin air filtration with thousands of professional drivers spending hours in the cabin of these long-haul prime movers.

The N99-rated cabin air filter is now available to suit a range of popular Kenworth trucks delivering safer

breathing conditions for vehicle occupants, keeping the cabin clean and protecting against harmful exhaust gasses, noxious odours, dust, and pollen containments that can develop into mould and bacteria.

Ryco has been designing and manufacturing filters for the Australian market since 1936 and continues to innovate, leading the industry with locally tested filtration for the North American vehicle fleet.

When considering the Ryco range, your fleet and investment remain in safe hands, with filtration designed to meet or exceed the original equipment specifications and maintain the factory warranty.

# CABIN AIR PROTECTION FOR YOUR WORKHORSE

Introducing the RCA429M Cabin Air Filter to suit a range of Kenworth trucks. Our Australian designed and developed 0.3 Micron, flame retardant^ filter media protects against contaminants such as virus\*, bacteria, mould, mites, pollen, fungus and spores, offering the best in-vehicle air purification against biological contaminants.

**SUITS:** Kenworth T360, T410, T410 SAR, T610 and T610 SAR

**REPLACES:** Paccar X1987001 / Fleetguard AF55839 / Donaldson P640110

Designed and tested to meet or exceed the OEM specification

Proven to meet the demands of Australian roads and conditions

\*H1N1/H3N2 ^Tested to ISO3795/GB8410

## EUROPEAN

Ryco's European commercial truck coverage has had a comprehensive expansion across manufacturers including Volvo, Mercedes, Scania, DAF, IVECO and the MAN truck range.

These European brands are globally proven platforms encompassing the latest technologies in driveline and cabin climate control, making them desirable for metropolitan, regional, and long-haul applications.

Each of these manufacturers is well placed within the market allowing them to adopt stringent EURO VI emission laws, making their drivelines both fuel efficient and clean.

Ryco not only provides a full family of filters, across wet and dry filter applications for the European fleet but is leading the industry in cabin air filter development.

Ryco engineering has actively worked with original equipment manufacturers from concept to production incorporating the very latest N99 rated filter media. Emphasising the close working relationship with OEM partners, Ryco will soon release a new N99 cabin air filter to support a brand-new truck model release with this solution.

The N99 media delivers safer breathing conditions for all vehicle occupants, protecting against harmful exhaust gasses, noxious odours, dust, and pollen containments that can develop into mould and bacteria.

Not only important for drivers and occupants but many of the European vehicle fleets are utilised by emergency service operations. Ryco has worked closely with this segment and incorporated fire retardant media across the N99 range.

Ryco is driven by innovation and the goal

to provide the best filter possible. As with all Ryco filtration products, you can trust your European fleet and investment remains in safe hands, with filtration designed to meet or exceed the original equipment specifications and maintain the factory warranty.

The European commercial vehicle segment continues to grow, and Ryco is focused on both innovation and expansion of the filtration offer.

# WHEN CREATIVITY SPARKS INNOVATION

**BE RYCO READY**

Fuel Filter

Oil Filter

Air Filter

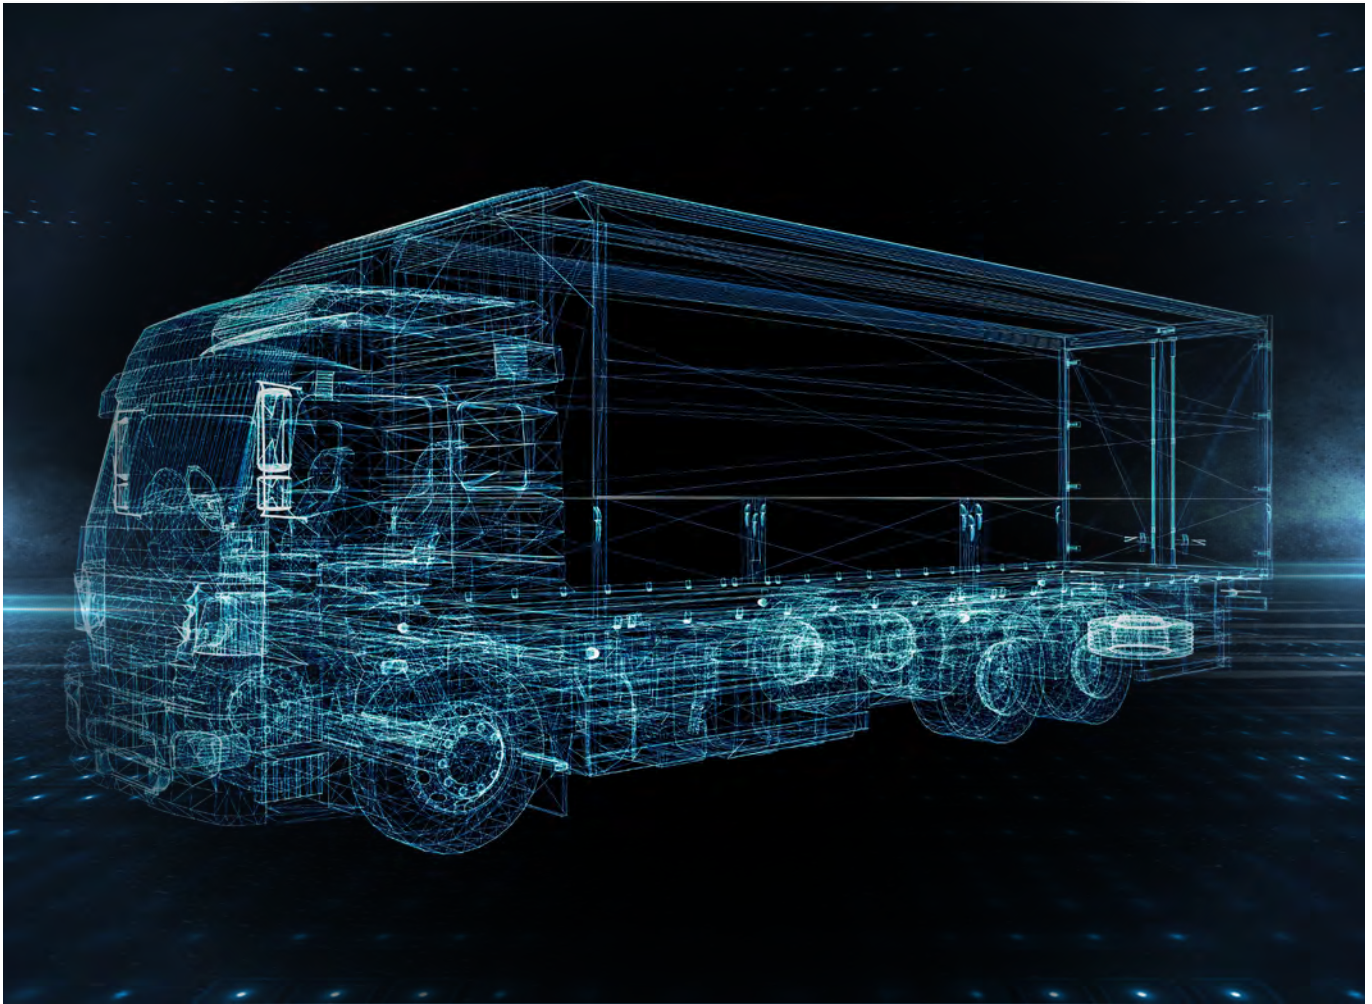

**Ryco is proud to be the Official Filtration Partner of the Supercars Championship.**

Along with being engineered, developed, and tested at its Melbourne Laboratory, Ryco's range of GEN3 Control Parts deliver outstanding filtration and extended engine life without compromising flow or performance.

So, when your everyday passenger, 4x4 or commercial vehicle needs the same protection as a Supercar, be Ryco Ready.

## JAPANESE

Japanese commercial trucks form one of the larger fleets of commercial vehicles on our roads and are critical to many industries. Ryco's comprehensive range of service kits to suit the Japanese fleet are nationally available through our distribution network and are a key focus of expansion for this growing segment.

Working closely with owner-operators, fleet managers, councils, emergency service operators, construction, mining and commercial repair centers, Ryco understands the need for efficiency in the service process.

A Ryco Japanese service kit is one of the most complete kits on offer, ensuring that all key filters are included in one box, with clear and easy-to-read labelling helping technicians to quickly cross-references to OE part numbers. Uniquely to the range of Ryco Japanese service kits, is the inclusion of a replacement sump plug washer, a simple addition driven by customer feedback helping drive productivity during service operations.

With extensive coverage across key

brands including HINO, Isuzu, FUSO, and UD, Ryco deliver the family of filters across both wet and dry applications, including oil, fuel, PCV, transmission, power steering and air filtration.

Just as important to keeping the fleet efficiently serviced, is a focus on the drivers of these vehicles. Each day, thousands of professional drivers take to the road with the cab acting as their primary place of work.

The cabin filter is designed to deliver safer breathing conditions for vehicle occupants, helping protect against harmful exhaust gasses, noxious odours, dust, pollen and contaminants that can develop into mould and bacteria.

Occupants may also be exposed to fine particles which can be hazardous to a driver's health. Without adequate cabin filtration, these particles will find their way through the Heating, Cooling and Ventilation (HVAC) and into the driver and passenger respiratory systems.

A key innovation at Ryco is the development of class-leading cabin air filtration, with an expanding selection of N99-rated cabin air filters. This media

is able to filter particles measuring as small as 0.3 Microns, exceeding OE specifications while providing unique protection for the drivers of these vehicles.

Ryco, working closely with the commercial truck industry, is driving the expansion of our range and continues to innovate, with the support of our Australian engineering and globally recognised testing capabilities.

When fitting the Ryco range of filtration products, your vehicle is in safe hands with each filter designed to meet or exceed the original equipment specifications and maintain the factory warranty of your vehicle.

## **HDA5889** AIR FILTER

Suitable for:  
- CONDOR / MK / PK

## **HDA5484** AIR FILTER

Suitable for:  
- CK / CG / CWB

# ISUZU DIESEL PARTICULATE FILTERS

With Diesel Particulate Filters commonly used in truck applications, Ryco has a range of DPF's suitable for Isuzu trucks.

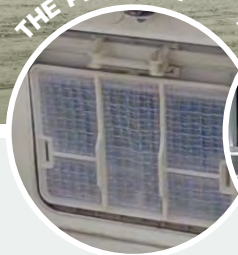

RYCO	ISUZU	APPLICATION	BOLT CONFIGURATION	YEARS
RPF280	8981551420	Various N Series with 4JJ1 and 4HK1 engines	8 bolt flange	2007 - 2012
RPF321	8976080562	F Series including FVD34/FVL34/FVM34/FVR34/FVY34/FVZ34 with 6HK1-TCS engines	10 bolt flange	From 2008
RPF348	8976080573	Various N Series with 4HK1 engines and F Series FSR34 with 6 HKI-TCC engine For FSD FRR/FTR/FTS 34 with 6HK1 engine, verify by OE part number	10 bolt flange	From 2012

RYCO	A DIMENSION (MM)	B DIMENSION (MM)	C DIMENSION (MM)	
RPF280	196	248.6	243	
RPF321	265	313	280	
RPF348	218	299	269.5	

THE PROBLEM

THE SOLUTION

# CABIN AIR PROTECTION FOR YOUR WORKHORSE

The Isuzu N & F Series from 2005 onwards were only fitted with a primitive "leaf tray". The OE leaf tray does not provide the driver protection against harmful exhaust gases, odours, soot, smoke or ash.

Designed to fit 2005 onwards ISUZU N & F Series, retrofitting a Ryco RCA428M Cabin Filter takes only minutes and will not only protect the cabin and the occupants but keep the HVAC system clean of unwanted debris that is time consuming to clean and service.

With 0.3 Micron technology and flame retardant filter media\*, RCA428M offers the best in-vehicle air purification against biological contaminants. such as virus\*, bacteria, mould, mites, pollen, fungus and spores.

Designed and tested to meet or exceed the OEM specification

Proven to meet the demands of Australian roads and conditions

\*H1N1/H3N2 ^Tested to ISO3795/GB8410

# UPGRADED RYCO MICROSHIELD CABIN AIR FILTER RANGE

## PRODUCT SNAPSHOT

### NEW 99 MEDIA, INCREASED FILTRATION RATINGS & FEATURES

**Efficiency Rating:**  
99.7% efficiency at 0.3 micron

**Micron Rating:**  
0.3 micron

**Product Numbering:**  
Brand new cabin filters as well as in-range cabin filters upgraded to N99 media will be denoted with an 'M' suffix. Filters denoted with an 'MS' suffix will be superseded across to the new N99 media specification. E.G. RCA162MS superseded to RCA162M

**Media Colour:**  
Yellow

**What is N99?**  
There are different classifications for respiratory masks in the medical industry. The 'N' number means the efficiency at 0.3 micron. N99 must be at least 99% efficient. A standard medical mask is N95. One of the media layers is made of melt blown non-woven fabric, is an essential material for medical masks (the filter layer in the middle of the mask).

## UPGRADE FEATURES

**500x**

The efficiency is dependent on micron size. N99 is more efficient at catching particles under 1 micron. N99 captures more than 500% more particles under 1 micron for example than regular cabin air filters.

**60%**

60% more media than our previous MicroShield Cabin Air Filter. Increase in media surface offsets restriction from high efficiency media and allowing HVAC systems to function normally. Achieves 0.3 micron with minimal affect on flow & dust holding.

**INCREASED SEALING**

3D scanning utilised to map OE housings to design and construct filters with greater filter sealing. Top 10 new part numbers designed to exceed OE in fit and sealing include: RCA164M, RCA224M, RCA182M, RCA227M, RCA162M, RCA100M, RCA185M, RCA104M, RCA140M, RCA108M

**VIRAL AND BACTERIAL PROTECTION**

Anti-viral and anti bacterial layers with natural poly-phenol extracts eliminate virus\*, bacteria and allergens from the air flow. The bio-compatible yellow coating is non toxic.  
\*H1N1/H3N2

SPECIALTY FILTERS

## OUR COMPLETE RANGE

# AIR DRYER FILTERS

### A SPIN ON AIR DRYER FILTER DESIGNED FOR WABCO STYLE AIR BRAKE SYSTEMS.

Air brakes have significantly improved the safety of braking systems in modern trucks and trailers. However, correct maintenance of all components of the braking system is of critical importance.

The air dryer is one of these components. Once air leaves the compressor it passes through the air dryer. The purpose of the air dryer is to remove impurities (water and/or oil vapours) before they reach the air tanks and valves.

The air dryer filter retains the moisture by the contents of the filter (either desiccant or coalescing). Moisture that condenses out also collects at the base of the dryer.

When the compressor unloads, water is expelled and dried air flows back through the system drying the filter contents.

In normal operating conditions, with correct brake system maintenance, the air dryer filter has a life expectancy of 2 years.

## Z925 HD AIR DRYER FILTER

A desiccant type spin on air dryer filter designed for Wabco style air brake systems. Designed to trap water for vehicles with low oil contamination.

#### Suits:

- WABCO 4324102227 / 4324100202
- FLEETGUARD AF27817
- DONALDSON BA5374
- MAN 81521086001
- MERCEDES-BENZ 4300969
- IVECO 2992261

## Z1059 HD AIR DRYER FILTER

A coalescing filter that not only traps water but also provides separation of oil to reduce contamination.

#### Suits:

- WABCO 4329012232
- FLEETGUARD AD27747
- DONALDSON P951413

**OUR COMPLETE RANGE**

# REFRIGERANT FILTERS

**THE TRANSPORTATION OF PERISHABLE AND FROZEN FOOD ACROSS THE VAST DISTANCES IN AUSTRALIA IS DEPENDANT ON REFRIGERATED TRUCKS AND ALSO TRAILER VANS FOR BOTH TRUCK PRIME MOVERS AND RAIL APPLICATIONS.**

In many instances the refrigeration system is powered by a diesel engine. Correct maintenance of the engine is required to ensure the refrigeration system performs as required.

Ryco is pleased to advise we have a range of filters to suit the two main brands of refrigeration systems, Carrier Transicold and Thermo King.
